The first deal. One trade. Ten calls.

Everything you need for the first paying client, in one short pack. No deck. No platform. One job, one price, one script.

What you are selling

One job, done by a machine, inside software they already own. Not a platform. Not a transformation. One person’s afternoon back.

SAY IT LIKE THIS

“We put a small AI worker on one job in your office — the one nobody wants. It works inside the system you already use. Two weeks to set up, £3,500, and if it doesn’t save the hours we agreed, you don’t pay the second half.”

Three things that make it easy to say yes:

- It is one job, so there is nothing to rip out.
- It is £3,500, so one person can sign it.
- It is two weeks, so nobody has to write a business case.

Who to call

Commercial cleaning contractors. The job is the same at every firm: timesheets become site audits become monthly invoices, all by hand.

Ten names, verified this week. Each has a named person, a source, and the reason to call now.

Monthind Clean Limited

Own website says over 800 staff and 250 cleaning clients across the East of England.
Call: **Simon Biggs**, Director / Partner
Job: Each month: collect site timesheets, check cleaning audits, then raise and send client invoices.
Why now: National Living Wage rose to £12.71 an hour on 1 April 2026, up 4.1%, on a payroll of several hundred cleaners.

Inter County Service Group Ltd

Trade press says the family firm employs more than 400 people.
Call: **Keith Nicholson**, Founder and director
Job: Every month: gather cleaner hours per site, confirm audits are done, then invoice each client.
Why now: Named Northampton Saints' official cleaning partner for the 2026/27 season on 15 September 2026, adding a stadium to its site list.

Dedman Contract Services Ltd

Own website says over 90 employees.
Call: **Derrick Dedman**, Managing Director
Job: Each month: collect cleaner hours from sites, run the audit check, then send client invoices.
Why now: National Living Wage rose to £12.71 an hour on 1 April 2026, up 4.1%, on a payroll of 90+ cleaners.

Goldservice Contract Cleaning Ltd

Accounts to 31 March 2025 show 230 average employees, up from 220.
Call: **Simon Hamilton**, Founder
Job: Every month: pull timesheets per site, check each cleaning audit, then raise client invoices.
Why now: National Living Wage rose to £12.71 an hour on 1 April 2026, up 4.1%, on a payroll of 230 cleaners.

Schools Offices Services Ltd (SOS)

Own website says around 200+ staff.
Call: **Richard O'Neill**, Founder
Job: Each month: collect school site hours, check cleaning audits, then invoice each school or academy.
Why now: National Living Wage rose to £12.71 an hour on 1 April 2026, up 4.1%, on a payroll of about 210 cleaners.

Rapid Commercial Cleaning Services Ltd (Rapid Clean)

Accounts to 31 March 2026 show 449 average employees, including 43 administrative staff, and turnover of £15.8m.
Call: **Paul Claxton**, Managing Director and co-founder
Job: Every month: check 450 site timesheets, confirm audits, then issue and chase client invoices.
Why now: Accounts for the year to 31 March 2026, filed in 2026, report turnover up 15.5% to £15.8m.

Mrs Buckét Cleaning Services Ltd

Accounts to 31 December 2025 show 423 average employees, up from 350.
Call: **Rachael Flanagan**, CEO and founder
Job: Each month: collect cleaner hours per school or site, check audits, then invoice each client.
Why now: Renewed a five-year cleaning contract with Olchfa School, Swansea, announced 31 March 2026, taking school partnerships past 30.

Office Care Limited (OfficeCare)
Own homepage states 350 people employed, cleaning offices, schools, stadiums and healthcare sites.
Call: **Martin Booth**, Managing Director
Job: Every month: gather cleaner hours per site, check audits, then invoice each client.
Why now: National Living Wage rose to £12.71 an hour on 1 April 2026, up 4.1%, on a payroll of 350 people.

The call

Five sentences. Say them in order, then stop talking and let them answer.

THE SCRIPT

"Hi, is that the owner? I'll be quick — I'm not selling software.

You invoice each site monthly and your office manager builds those invoices from timesheets. Is that roughly right?

I build a small AI worker that does that one job — the timesheets, the site sheets, the invoices — inside the system you already use.

It takes two weeks and costs £3,500. If it doesn't save the hours we agree, you don't pay the second half.

Can I show you on your own last month's sheets, Thursday or Friday?"

Write down three things: how many sites, who does the invoicing, and what that person's week looks like. That is your prep for the second call.

Listen for a number, not for interest. “We do about 140 sites.” “That takes her two days a month.” A number starts a deal. “Interesting” does not.

If they push back. Three answers cover most of it.

THEY SAY	YOU SAY
“We already have software for that.”	“Then this sits on top of it. It does the typing between the systems, not the thinking.”
“My office manager would worry.”	“Good. She is the one who tells it what to do. It takes the boring half of her day, not her job.”
“How do I know it works?”	“You don’t yet. That is what the two weeks are for — it runs on last month’s real sheets.”

If they say no: “What would have to be true for this to be worth twenty minutes?” Write the answer word for word. Ten real objections are worth more than one polite maybe.

What you send after

One page. The same page every time, with their job in it.

THE ONE PAGE

What it is. One worker that does your site paperwork: collects the timesheets, checks them against the site sheet, builds the monthly invoice, and lists what is missing.

What goes in. The timesheets and site sheets you already have. Nothing moves. Nothing gets replaced.

What comes out. A clean invoice pack per site, a list of gaps before they become disputes, and a short weekly note of what was done.

What it must never do. It does not approve hours, sign anything, or change a price. Anything that looks like a dispute goes to a named person and waits.

The two-week test. We run it on last month’s sheets. If it doesn’t match what your team produced, you keep your money.

The price. £3,500 for the install and the test. £1,250 a month after that, cancel with a month’s notice.

The money, said plainly

WHAT THEY PAY NOW	WHAT IT COSTS	WHAT THEY GET
One admin on £28,000 costs about £35,000 once you add employer costs	£3,500 to install, then £15,000 a year	The hours that person spends on invoicing, every month, without hiring

Say the second line out loud on the call. It is the whole argument, and it is checkable in front of them.

The week

DAY	DO THIS
Monday	Send ten emails at 7am. Call the same ten at 10am.
Tuesday	Same ten again, different time of day.
Wednesday	Send the one page to anyone who gave you a number.
Thursday	Two demos on their own files.
Friday	One follow-up per person, then stop.

Ten a day, five days. Fifty conversations is enough to find the first yes. If it is not, the job is wrong, not the market — change the job and keep the list.

WHAT DONE LOOKS LIKE

One paid install at £3,500, a start date in the diary, and the job written down in one paragraph that both of you have signed.
