TWINTHOS · TARGET LIST · 21 OCTOBER 2026

# 114 verified UK firms. 24 worth calling first.

Every name below was checked against a live company page or a published vacancy on 21 October 2026. Eight sectors, one repeated job each, and a named person who owns the cost.

## We are not selling a chatbot

- **The Brain.** The client’s rules, pricing, tone and past decisions. It does not reset, and it never invents a memory.
- **The Employee.** One job with a written definition: what goes in, what comes out, what it must never do, when it escalates.
- **The Desk.** It works through the screens they already own. No API, no migration. First job live in about two hours.

> ChatGPT, Grok, Muse and Claude are general assistants sold per seat: no knowledge of the firm, no permissions, no audit trail, nobody accountable. That is a different product, not a cheaper one.

# The seven jobs that repeat everywhere

| THE JOB | WHERE IT SHOWS UP |
|---|---|
| **Chase a document** | Medical records, payroll inputs, certificates, DBS, right-to-work, source of funds |
| **Re-key the same data** | Invoice → customs entry → carrier portal → customer tracker |
| **Open and close a file** | Matter opening, post-completion, claim set-up, deposit registration |
| **Book and rebook** | Repair appointments, service rounds, recall lists, interview slots |
| **Assemble the pack** | Court bundle, CQC evidence, O&M file, renewal comparison, demands-and-needs |
| **Reconcile and chase money** | Timesheet → invoice, insurer remittance, carrier rate card, arrears |
| **Answer “where is it?”** | Shipment status, claim progress, case progression |

## What we say in the first email

- **One job, named.** Not “AI for your firm” — “the post-completion sequence”, “the annual service round”, “the payroll input chase”.
- **Measured on their material.** £999 fixed audit, five working days, one job measured on their own files, a working agent shown on their documents.
- **Then deploy.** £2,500 setup and £750 a month for the first workflow; first job live inside two weeks.

| BUY | ANNUAL | WHAT IT MUST DO |
|---|---|---|
| One UK admin | **£35,000** | 1,950 hours, then goes home |
| Foundation | **£9,000** | One workflow, not a role |
| Brain + desk | **£60,000** | Replace 1.7 salaries, or add £60k of revenue |

> £28,000 × 1.25 loading = £35,000/yr = £2,917/month = £17.95/hour — an assumption, stated as one. Market check: the UK managed-agent band is £750–£2,000/month per role, so never price against other AI agencies; price against the salary being absorbed.

## Sources, and what we did not do

- **114 companies** across legal, insurance, accountancy, recruitment, property, healthcare, field service and logistics, each checked on its own site or a live vacancy. Register: `audit/target-register.json` in the brain.
- **100 of them** have a named decision-maker with a role and a source URL.
- **No emails, no direct dials.** Names only where the firm publishes them.
- **Everything is filed.** The full register sits in the brain; twinthos.com carries the public version.
- **No client results.** Demos are illustrative; no client has bought this as a paid service yet, and we say so.
- **Excluded on purpose:** firms already shipping their own agents on the same job (Keoghs, Cargo Overseas, Ringley's PlanetRent), brands that no longer exist (Heat Recruitment, acquired 8 Oct 2026), and anyone above the size we can serve.
