Twinthos — AI Adoption Enablement Platform

> What I Build: Digital Employees That Run Your AI Adoption Loop, Not Just Watch It.

THE 6 TWINNDBOTS THAT REPLACE AN AI ADOPTION TEAM

- **Prospector** — Scans your files, emails, calendars and meetings every day to find every task that could be automated or given to Copilot. It scores each by time saved and ROI, builds a live register you can show to executives. Outputs: Excel list, SharePoint folder, or weekly report to Teams.
- **Coach Bot** — Runs 20-minute micro-sessions inside Teams during natural meeting gaps. It quizzes each participant on prompt technique in real time, records mastery, and surfaces a tailored learning path. One person learns deeply, shares in 5 minutes, multiplies across 100 colleagues.
- **Compliance Watch** — Watches every prompt that exits Copilot. Flags PII, policy breaches and hallucinations instantly. Auto-generates a remediation note for managers with the original prompt and fix recommendation. No manual audits, no fines.
- **Use-Case Calculator** — When Prospector flags "invoice-matching uses 3 hours/week" it immediately multiplies by team size, frequency and blended rate to produce a £ figure. You see quarterly savings before the first training session.
- **Stakeholder Liaison** — Takes each human-identified problem, writes it into a job spec (inputs, decisions, escalation), and either builds a guardrail bot or routes to the right team. It keeps the loop moving, not paused.
- **Adoption Dashboard** — Pulls usage metrics from Copilot, the Prospector register and Compliance Watch into a single page that shows who is active, what prompts are working, and where to coach next. Refreshes hourly, no spreadsheet work.

MAPPING TO THE AI ADOPTION TRAINER ROLE

Key Responsibility	Our Response
Identify AI opportunities in existing processes	Prospector bot creates a live register of every automatable task, scores each by time/cost saved, exports to Excel.
Support Copilot adoption	Coach Bot runs micro-sessions inside Teams, quizzes prompts in real time, records mastery per user.
Design workshops and learning resources	Prompt library auto-generated, each prompt tagged to job function and difficulty level, updated weekly.
Help develop effective prompting techniques	Coach Bot teaches prompting live, shows before/after use cases, gives instant feedback, captures mistakes for future training.
Encourage responsible AI adoption	Compliance Watch scans prompts for PII, policy breaches and hallucinations, auto-notifies with remediation steps.

Monitor adoption & gather feedback	Adoption Dashboard shows live usage, mastery per user, compliance flags, and ROI in £ — all in one page.

WHY IT MATTERS FOR A PROFESSIONAL-SERVICES FIRM

- **Capacity, not headcount.** A 10-person AI Adoption team running daily bots frees up £500k+ of senior hours for billable work.
- **Compliance built in.** Finance, legal and HR get audit-trail confidence without slowing adoption.
- **Risk eliminated.** No prompt data leaves the tenant; all checks are automated and logged.
- **Measured outcomes.** You see £ saved each month, not "adoption%" or "confidence scores".

PACKAGES

- **Foundation** £2,950 setup + £950/mo — Prospector + Dashboard
- **Full Adoption** £4,500/mo — Prospector + Coach Bot + Compliance + Calculator + Liaison + Dashboard
- Operations Audit £999 one-off — 32-page scan with 24 checks each, results to zero findings, ready for £££ savings proof.
