Tyson Mandela

AI systems architect — agent design, automation, verification

Bath, United Kingdom · hello@twinthos.com
twinthos.com · github.com/alkalinearchitect

12 years solo · 21 public repositories · 6 books · 15 live sites · 114-firm research register

SUMMARY

Systems architect and solo founder. For twelve years I built and ran my own digital businesses; now I specify, build and operate the AI agents that take a defined, repeating job off a team and keep it running inside the tools that team already owns. I write the job specification — inputs, decision rights, escalation, audit trail — before any code exists, then prove the work with automated checks rather than assurances. Most recently: a 526-line document pipeline behind a nine-check release gate, and a 32-page site audit at 24 checks a page that drove local findings to zero.

CORE COMPETENCIES

AI agents · agentic workflows · LLM orchestration · prompt and tool design · human-in-the-loop approval · Python · Flask and FastAPI · REST APIs and webhooks · key-free scraping and automation · release gates and machine checks · market research and pricing analysis

EXPERIENCE

Founder and Principal Consultant — Twinthos

Bath, United Kingdom · 2024 – present · solo operator, no employees, no outside funding

- Built the company end to end — product specification, live 24-route site, commercial offer and delivery pipeline — and shipped 289 commits in 18 days.
- Specified the delivery contract for every engagement: inputs, decision rights, escalation, evidence. That specification is the product, not the software.
- Built the tooling the offer depends on — a 526-line HTML-to-PDF pipeline with a nine-check release gate, a 32-page × 24-check site auditor, and a source verifier that re-fetches every cited page.
- Proved disaster recovery rather than asserting it: deleted a knowledge file and restored it byte-identical from an hourly private mirror.
- Set the commercial offer from external comparables: £3,500 per month for a managed digital employee, £999 for a one-off operations audit.

Founder, Owner and Content Lead — Human Architect / Alkaline Architect

2013 – 2025 · health and nutrition publishing · twelve years, exited

- Built an audience from zero to 359,926 video views across 71 videos with no paid acquisition.
- Built the protocols, digital products and systems that sold to that audience, teaching the reasoning before the product.

- Published six books under a pen name — Alkaline Awakening, Intelligent Design, Life Force Energy, Body OS, Parasite Conspiracy, Quit PRN Manual — while automating the daily workflow end to end.
- Sold the brand and the social handle to Jason van Blerk of The Human Garage.

Founder — Humanitai CIC

Companies House 16891121 · current · community interest company

- Built a key-free Python scraper across four UK funding bodies that publishes 29 verified opportunities each week.

SELECTED PROJECTS AND EVIDENCE

- **Site auditor and fix pass** — 32 pages at 24 checks each; drove local findings to zero and separated eight genuine hosting limits from repository defects.
- **Document pipeline** — 526-line builder plus a 353-line gate covering geometry, margins, clipping, page fill, type sizes, text-layer integrity, links, metadata and contrast.
- **Research register** — 114 UK firms with a named decision-maker at 100 of them; 77 of 80 named people re-confirmed by re-opening the cited page before publication.
- **Long-form book** — 83 pages, 314 clickable source links, and a section stating what would prove the thesis wrong.
- **Security review** — found a server bound to all interfaces exposing a repository and its history, plus 25 secret matches in backup history; closed the exposure and fixed the redaction gap.
- **Job market sweep** — 245 unique adverts parsed, 55 training-course adverts identified and excluded, the exclusion reported rather than hidden.

METHODS

Loop engineering — write the pass test first, fix, re-run the identical script, and treat the difference between runs as the proof. **The one page** — one job per page, one price ladder, a clickable link for every doubtable claim. **Five-factor scoring** — weighted criteria with caps, floors and written reasons for every exclusion.

PUBLICATIONS

Six books published under a pen name in health and nutrition. Twelve long-form articles published to a written house style. An 83-page market book with 314 cited sources.
