Tyson Mandela

AI Systems Architect — I build agents that take a job off a team and keep it running.

Bath, United Kingdom · hello@twinthos.com · twinthos.com · github.com/alkalinearchitect

SUMMARY

I build AI agents and the systems around them. I write the spec first — inputs, decisions, checks, audit trail — then build it inside the tools a team already owns, and prove the output with automated tests rather than assurances. Twelve years building my own products, solo, end to end.

CORE SKILLS

AI agents: agent design · LLM orchestration · prompts and tools · human-in-the-loop · retrieval-first knowledge

Engineering: Python · Flask · FastAPI · REST · webhooks · key-free scraping · automation

Verification: release gates · machine checks · source re-fetching · site auditing · security review

Delivery: document pipelines at volume · market research · pricing from comparables

EXPERIENCE

Founder & Principal Consultant — Twinthos

Bath, United Kingdom · 2024 – present · solo, no employees, no funding

- Built the company end to end — product, live 24-route site, commercial offer and delivery pipeline — and shipped 289 commits in 18 days.
- Specified the delivery contract — inputs, decisions, escalation, evidence — and made that specification the product, not the software.
- Built the tooling the offer depends on: a 526-line PDF pipeline with a nine-check gate, a 32-page site auditor, and a source verifier that re-fetches every cited page.
- Proved disaster recovery rather than asserting it: deleted a file and restored it byte-identical from an hourly private mirror.
- Priced the offer from external comparables: £3,500 per month for a managed digital employee, £999 for a one-off operations audit.

Founder, Owner & Content Lead — Human Architect / Alkaline Architect

2013 – 2025 · health and nutrition publishing · exited

- Grew an audience to 359,926 video views across 71 videos with no paid acquisition.
- Published six books under a pen name while automating the daily workflow end to end.
- Sold the brand and the social handle to Jason van Blerk of The Human Garage.

Founder — Humanitai CIC

Companies House 16891121 · current · community interest company

- Built a key-free Python scraper across four UK funding bodies that publishes 29 verified opportunities each week.

SELECTED WORK

- **Site auditor** — 32 pages at 24 checks each; drove local findings to zero.
- **Document pipeline** — 526-line builder plus a 353-line gate; zero failures on re-run.
- **Research register** — 114 UK firms, a named decision-maker at 100 of them.
- **Market book** — 83 pages, 314 cited sources, and a section on what would prove it wrong.

- **Security pass** — found a server exposed to the internet with its history and secrets, then closed it.

METHODS

Loop engineering — write the test first, fix, re-run, treat the difference as the proof. **The one page** — one job per page, one price ladder. **Five-factor scoring** — weighted, with reasons.
