Tyson Mandela

AI systems architect — agent design, automation, verification

Bath, United Kingdom · hello@twinthos.com · twinthos.com · github.com/alkalinearchitect

SUMMARY

I build AI agents and the systems around them. An agent gets a written job spec first — inputs, decision rights, escalation, audit trail — then it runs inside the tools a team already owns. Every deliverable ships behind a machine check, and a cited claim is re-opened before it goes out. I work solo, end to end, and I say plainly what is true, what is unknown, and what a thing costs.

CORE SKILLS

- **Agent / LLM design:** agent job specs, human-in-the-loop approval, retrieval-first knowledge, swappable models, delivery contracts, platform architecture
- **Automation / Python:** Python, Flask, FastAPI, REST, OAuth, webhooks, JSON/CSV pipelines, key-free scrapers, cron, Git, Linux, static-site and CDN
- **Verification / quality:** release gates, machine checks, source re-fetching, contrast and overflow QA, website auditing, disaster recovery
- **Document / PDF systems:** measured A4 PDF, type scales, real links, metadata, house-style pipelines, volume production
- **Research / analysis:** prospect registers, weighted scoring, market books, competitor teardown, job-market sweeps, OSINT
- **Commercial / product:** positioning, pricing from comparables, go-to-market loops, solo operations

WHAT I CAN DO

- Turn a job into an agent: write the spec first, then build it inside the tools you already own.
- Automate the work underneath with Python, APIs, webhooks, and scheduled jobs.
- Prove the output with release gates, machine checks, and re-fetched sources — if it cannot be checked, it does not ship.
- Audit a live system and name what is real, separating true defects from platform limits.
- Ship documents at volume while holding one house style across hundreds of pages.
- Research a market to a named person, every claim traced to the page it came from.

HOW I WORK

- I write the job spec before a line of code: what the agent receives, what it may decide alone, what it escalates, and the audit trail it must leave.
- Everything ships behind a machine check — a release gate, a contrast test, a re-fetched source. If it cannot be checked, it does not go out.
- I work in short loops: write the pass test, build, re-run the same script, and treat the difference between runs as the proof.
- Every claim I make is traceable to the page it came from. I say plainly what is true, what is unknown, and what a thing costs.
- I work solo, end to end — spec, build, verify, ship — so nothing is lost between hands.

EXPERIENCE

Founder — Twinthos

AI-agent / digital-employee platform

Built the company end to end: product definition, live site, document pipeline, backup, and audit. No employees, no outside funding. Wrote the two-part platform — a persistent BRAIN plus cloud digital employees on one infrastructure — and set pricing from external comparables.

Human Architect / Alkaline Architect

Health and nutrition brand · 2013–2025 (as stated)

Grew an audience to 359,926 views across 71 videos with no paid acquisition. Published 6 books under a pen name. Sold the brand and social handle to Jason van Blerk of The Human Garage.

Founder — Humanitai CIC

Community interest company · Companies House 16891121

Built a key-free UK grant scraper with weekly capture, and a self-hosted OSINT forecast system.

SELECTED WORK

- **Document pipeline:** a 526-line builder and a 353-line gate running 9 machine checks — 0 failures on re-run.
- **Live-site auditor:** 32 pages × 24 checks, local findings driven to 0.
- **114-firm UK register** with a named decision-maker at 100 of them.
- **Source verification:** 77 of 80 named people re-confirmed by re-opening the cited page.
- **83-page market book** with 314 clickable source links.
- **HotBox booking audit:** 146 sessions, 4,031 places, 57 tickets sold, 1.41% conversion.
- **21 public GitHub repositories;** 289 commits in 18 days on the live site.
- **Security:** found and closed an exposed local server and fixed a secrets redaction gap.
