Tyson Mandela

AI systems architect — I build agents that take a repeating job off a team and keep it running.

AGENT DESIGN · AUTOMATION · PYTHON · APIS · VERIFICATION · DOCUMENT SYSTEMS

Twelve years building my own products. **Now I build the systems that do the work:** specified before they are coded, gated before they ship, and proven on live data.

12	21	6	15
years solo	repos	books	live sites

WHAT I CAN DO

Six things, proven not claimed

Turn a job into an agent

Write the specification first: inputs, decision rights, escalation, audit trail. Then build it inside the existing tools.

Automate the work underneath

Python, Flask, FastAPI, REST APIs, OAuth, webhooks, key-free scrapers, cron scheduling.

Prove the output

Gates, machine checks, source re-fetching, contrast and overflow tests. If it cannot be checked, it does not ship.

Audit a system and name what is real

32 pages at 24 checks each: separate true defects from platform limits.

Ship documents at volume

A 526-line pipeline that holds a house style across hundreds of pages without degrading.

Research a market to a named person

Every company, every decision-maker, every claim traced to the page it came from.

METHODS I NAMED

Loop engineering · the one page · five-factor scoring · the five-minute test

EXPERIENCE

Founder and principal consultant

TWINTHOS · BATH, UK · 2024 — PRESENT

Solo operator. No employees, no outside funding. I built the company end to end — product, site, offer and pipeline.

- Specified the delivery contract: inputs, decision rights, escalation, evidence. That specification is the product.
- Built the platform: a 24-route site, 289 commits in 18 days, a 208-file knowledge layer that restores at session start.
- Built the tooling: a 526-line PDF pipeline with a nine-check gate, a 32-page × 24-check auditor, a source verifier.
- Proved the recovery: deleted a file, restored it byte-identical from an hourly private mirror.

BEFORE TWINTHOS

Twelve years of my own business

Founder, owner and content lead

HUMAN ARCHITECT · ALKALINE ARCHITECT · 12 YEARS, EXITED

- Built the audience from zero: 71 videos, 359,926 views, no paid acquisition.
- Built the health protocols, digital products and systems that sold it — teaching the why before the what.
- Published six books under a pen name while automating the daily workflow end to end.
- Sold the brand and the social handle to Jason van Blerk of The Human Garage.

Founder

HUMANITAI CIC · COMPANIES HOUSE 16891121 · CURRENT

- A key-free Python scraper over four UK funders publishing 29 verified opportunities weekly.

EVIDENCE

What I can show you

A 32-page site audit at 24 checks a page that drove local findings to zero and named the eight only DNS could fix.

An 83-page book with 314 clickable source links and a section on what would make me wrong.

A security pass that found a server bound to 0.0.0.0 exposing .git and 25 secret matches in backup history — then fixed the redaction gap.

A 245-advert jobs sweep that excluded 55 training-course ads and reported the exclusion.
