Tyson Mandela

Now building AI agents, workflows and simulation models.

Bath / Bristol, UK · humanarchitect@protonmail.com · twinthos.com

From 2013 to 2024 I built digital businesses, taught and made content. I have worked in AI since 2019. I am an AI enthusiast who lives and breathes it. The field changes constantly, so I keep my finger on the pulse: to stay current, see where it is heading, and for security. Now I audit where companies lose flow, build AI agents to remove the drag, and run simulation models for projects and ideas.

CURRENT EXPERIENCE

Twinthos

Founder · Present

- Build AI agents for repetitive admin, with rules.

CAPABILITIES

Operational drag. Auditing where a company's work stalls.

Flow. Automation with AI agents, under written rules.

Prompt engineer. Loop prompting and geometric learning, building reasoning into models to make them smarter.

Prediction. Simulation models for projects and ideas.

Viral content. Short-form video, published daily.

AI generation. Photorealistic images and AI UGC video.

Communication. Articulating complex subjects and simplifying them, in teaching and content.

EARLIER CAREER

Humanarchitect

Founder and content creator · 2013 to 2024

- Daily organic content on education and mindset, reaching around 20 million views a month at peak.
- Built an Instagram account to 500,000 followers and sold it to Jason van Blerk of The Human Garage in late 2024.
- Author of published books, written under a pen name.

Online university on Skool

Owner and educator · 2,000+ students at peak

- Ran it as a place of education and community to inspire knowledge, health and vitality.
- Designed every course and used gamification to get members engaging.
