views a month at peak

2,000+
students in an online school

500K
Instagram followers built and sold

7
titles: one book, six ebooks

PROFILE

I explain what I build. Before Twinthos I made daily on-camera video and wrote books, grew organic content to around 20 million views a month, and built an online school of more than 2,000 students. Since 2026 I have run Twinthos, which designs AI employees: AI agents that do one defined job inside a business's existing tools, under written rules, with a named person accountable for the result.

STRENGTHS

Communication, planning, strategy and implementation: the strengths I have shown in work with some of the world's leading athletes and performers.

EXPERIENCE

Founder, Twinthos

Bath / Bristol, UK · 2026 – present

- AI consultation: finding which recurring work is worth handing to AI, and which to keep human.
- Designs the workflow, rules, tools and handover behind each digital employee, with a named person accountable for each.
- Built the first landing page (HTML, CSS, Git). Then directed AI agents to build and run the rest of the site and its research, publishing and backup systems.
- Set the positioning, pricing and launch order. Researched UK firms and their decision-makers before outreach.

Director, HumanitAI CIC

Companies House 16891121 · Dec 2025 – present

- Community interest company for AI-safety education and digital-inclusion training in the UK.

EARLIER WORK

Creator, author and educator

Independent · before Twinthos

– Daily on-camera video and short-form content. Around 20 million views a month at peak, organic.
– Built and ran an online school of more than 2,000 students, and designed its courses.
– Built recurring-revenue systems and digital products. Wrote one book and six ebooks on health, nutrition, addiction science, brain rewiring and disease prevention.
– Built an Instagram account to 500,000 followers and sold it to Jason van Blerk, co-founder of Human Garage. Rebuilt a new account to 55,000 followers in 2026.
– Worked with Novak Djokovic on performance, through oxygen therapies. Also worked with Anthony Joshua and John Travolta, among others.

SKILLS

AI adoption
Deciding what to hand to AI, setting the rules, and checking the result.

Communication
On-camera teaching, plain-English writing, books and ebooks.

Strategy and planning
Positioning, pricing, launch order and audience.

Implementation
A live service site, a paid school of 2,000+ students, digital products.

Audience growth
20 million monthly views (organic). 500,000 followers built. 55,000 rebuilt.

Web and publishing
HTML, CSS, Git and GitHub Pages.
