Tyson Mandela

Founder, Twinthos — AI adoption, strategy and communication

Bath / Bristol, UK · twinthos@agentmail.to · twinthos.com · github.com/twinthos

20M monthly views at peak · **2,000+** students · **500K** follower accoun

SUMMARY

I explain what I build, then prove it works. Before Twinthos I made daily on-camera video, grew organic reach to about 20 million views a month and built a paid online school. Since 2026 Twinthos has designed AI employees: agents that do one defined job inside a company's own tools, under written rules, with a named person accountable.

EXPERIENCE

Founder — Twinthos

Bath / Bristol, UK 2026 – present

– Runs AI consultation that separates the recurring work worth handing to AI from the work that should stay human.

– Designs the workflow, rules, tools and handover behind each digital employee, with a named person accountable for every one.
– Built the first landing page (HTML, CSS, Git), then directed AI agents to build and run the rest of the site and its research, publishing and backup systems.
– Set the positioning, pricing and launch order, and researched UK firms and their decision-makers before outreach.

Director — HumanitAI CIC

CIC · Companies House 16891121 Dec 2025 – present

– Runs AI-safety education and digital-inclusion training for people and organisations in the UK.

CORE SKILLS

AI adoption — Deciding which recurring work to hand to AI, writing the rules it works to, and checking the result before it ships.

Strategy and planning — Positioning, pricing from comparables, launch order, and the sequence that gets a product to market.

Communication — Daily on-camera teaching, plain-English writing, one book and six ebooks, and technical work explained to non-technical buyers.

EARLIER CAREER

Creator, author and educator

Independent — before 2026

– Made daily on-camera video and short-form content, growing organic reach to around 20 million views a month at peak.

– Built and ran an online school of more than 2,000 students, and designed every course in it.

– Built recurring-revenue systems and digital products, and wrote one book and six ebooks on health, nutrition, addiction and brain rewiring.

– Built an Instagram account to 500,000 followers and sold it to Human Garage co-founder Jason van Blerk; rebuilt a new account to 55,000 in 2026.

– Worked with Novak Djokovic on performance through oxygen therapies, and with Anthony Joshua and John Travolta.

HOW I WORK

Plain English over jargon — every document is written so a non-technical owner can approve it without a translator.

Rules before tools — nothing ships until its boundaries, its rules and the person accountable for it are written down.

Evidence over assurance — a result counts when it can be checked, not when it is claimed.

PROOF

twinthos.com — the live service site, built and run by Tyson

github.com/twinthos — public repositories

Companies House 16891121 — HumanitAI CIC, director since December 2025

TOOLS AND METHODS

Implementation · Audience growth · Course design · Publishing · HTML, CSS, Git and GitHub Pages · AI agents (Hermes Agent, Claude Code, Codex)
