Tyson Mandela

I help businesses hand their repeat work to AI, in plain English.

Bath / Bristol, UK | twinthos@agentmail.to | twinthos.com | github.com/twinthos

SUMMARY

Every business has jobs that repeat every week. I find them, decide which an AI can do safely, write the rules it follows and check the work before it goes live. I also teach teams to use AI without breaking anything.

SKILLS

Finding the work worth automating
Writing rules an AI can follow
Checking AI output before it ships
Explaining tech to people outside tech

Tools: Hermes Agent, Claude Code, Codex, Google Workspace, HTML, CSS, Git

EXPERIENCE

Founder, Twinthos

2026 to now

AI systems for small businesses

- I find the jobs a business repeats every week, then decide which an AI can take and which must stay with a person.
- I write the rules the AI follows and check its work before it goes live.
- I built the first version of our website myself, then used AI to build the rest.

Director, HumanitAI CIC

Dec 2025 to now

Companies House 16891121

- I run training for UK groups on using AI safely and getting more people online.

Founder, online school

2013 to 2025

Self-employed

- I built an online school with more than 2,000 students, and wrote every course myself.
- I grew social content to around 20 million views a month.
- I built subscription products, and wrote one book and six ebooks.
- I worked with Novak Djokovic, Anthony Joshua and John Travolta on performance and oxygen therapy.
