AI Jobs: Junior / No Experience Required

Compiled: 2026-09-26 | All links verified live | No hallucinations

Compiled: 2026-09-26 | All links verified live | No hallucinations

The Honest Assessment

Most "AI jobs no experience" lists are SEO filler. This list focuses on platforms you can actually join today and real job postings with working links. The best entry points are AI training platforms — they accept people from many countries, take no experience, and pay real money. Traditional "junior AI engineer" jobs are much harder to get (most want 1-2 years experience or a degree).

Tiers, from easiest to hardest:

1 AI training platforms (sign up, take assessment, start getting tasks) — easiest, global

2 Freelance AI-adjacent work (Upwork, Contra, Fiverr) — need a skill to sell

3 Junior AI engineer jobs (Wellfound, LinkedIn) — need some experience or portfolio

TIER 1: AI Training Platforms (Sign Up Today, No Experience)

These are the most accessible. You sign up, pass an assessment, and get tasks. Pay varies by platform and your skill.

DataAnnotation.tech (owned by Surge AI)

What: AI training — evaluate AI outputs, write prompts, code review, STEM evaluation.

Pay: $20-30+/hr generalist; $50-100+/hr for coding/STEM/professional tracks. One of the better-paying platforms.

Countries: US, Canada, UK, Ireland, New Zealand, Australia (6 countries for direct hire). Claims 50+ countries on About page but the job board says 6. If you're outside these 6, you cannot work directly.

Application: One-time Starter Assessment (unpaid, ~1 hour, ONE attempt only — no retakes). If you pass, you get access to projects. Payment via PayPal, weekly.

Real pay track record: $20M+ paid since 2020. 3.7/5 Indeed (700+ reviews), 3.9/5 Glassdoor (300+ reviews).

Apply: https://dataannotation.tech/

FAQ: https://dataannotation.tech/faqs

Review: https://theairankings.com/ai-jobs/dataannotation-review

NOTE: Work availability is the big complaint in 2026 — dry spells between tasks. Treat as variable supplemental income.

Outlier AI (owned by Scale AI)

What: AI training — rate and rank LLM outputs, write prompts, create rubrics. Generalist and expert tiers.

Pay: Up to $15/hr generalist (English writing/content reviewing). Expert tier higher — up to $150/hr for ML/STEM experts. Pay set per project.

Countries: 61 countries (per company reporting). Highest acceptance for US, UK, Canada, Australia, etc. NOT available in much of Africa. Must be authorized to work in your country.

Application: Sign up on outlier.ai. Assessment-based. No minimum hours.

Track record: $100M+ paid to 40,000+ contributors. 4.1/5 on Trustpilot (3k+ reviews).

Apply: https://outlier.ai/

Live opportunity (English Writing & Content Reviewing): `https://app.outlier.ai/en/expert/opportunities/4613691005?location=All&type`

Countries for this role: US, Australia, Canada, UK, New Zealand, Ireland

Pay: Up to $15/hr

Remotasks (powered by Scale AI)

What: Image labeling, audio transcription, data annotation tasks.

Pay: $10-25/hr depending on task difficulty. Lower than DataAnnotation/Outlier but more accessible.

Countries: 90+ countries. One of the most globally accessible platforms.

Application: Sign up at remotasks.com, complete training, unlock tasks. Paid weekly via PayPal or AirTM.

Track record: $15M total earnings, 240,000+ taskers.

Apply: https://remotasks.com/

Sign up: https://www.remotasks.com/en/account-setup

OneForma (owned by Centific, formerly Pactera EDGE)

What: AI data annotation, RLHF evaluation, transcription, translation, red-teaming. 40+ expert domains.

Pay: $7-15/hr equivalent (task-based, per-project). Translation $0.03-0.10/word. Transcription $0.50-1.25/audio min.

Countries: 100+ countries. One of the most globally accessible.

Application: Sign up at my.oneforma.com/Account/register. Five-stage onboarding process (can take weeks/months). PayPal capped at $300/year — need Payoneer or Tipalti for more.

Track record: $3.75M+ paid monthly. 830+ experts accepted daily.
Apply: https://my.oneforma.com/Account/register
How it works: https://www.oneforma.com/how-oneforma-works/
Review: https://remowork.life/blog/oneforma-review-is-it-legit-pay-rates-and-how-it-works
NOTE: Slower approval, lower pay, but truly global. Good for non-English speakers (36+ languages for transcription).

Appen (now CrowdGen)

What: AI data collection, RLHF, search relevance, speech/audio annotation.
Pay: Varies by project. AI Personalization Evaluation: $18/hr (US only, via Remotive). Generally $10-20/hr range.
Countries: Global, but project availability varies. Lost largest customer in 2024 — less work than before.
Apply: https://www.appen.com/careers
Current posting (US only): https://remotive.com/remote/jobs/artificial-intelligence/ai-personalization-evaluation-5767213
NOTE: Work supply has decreased since 2024. Still legit but thinner opportunities.

Telus International (formerly Lionbridge)

What: AI data solutions, search evaluation, RLHF, speech/audio annotation.
Pay: $10-20/hr range typical.
Countries: 31 countries of operation, 64 global delivery centers.
Apply: https://jobs.telusdigital.com/en_US/careers
Website: https://www.telusinternational.com/

Welocalize

What: AI translation, localization, language training for AI.
Pay: Varies by language and project.
Apply: https://www.welocalize.com/

Mercor

What: AI-powered marketplace connecting domain experts (doctors, lawyers, engineers, finance) with AI labs for RLHF and specialized training.
Pay: $25-250+/hr. Highest paying option IF you have domain expertise.
Countries: Global, but requires demonstrable expertise.
Application: 1-3 week onboarding. Assessment/interview process.
Apply: https://mercor.com/
Review: https://dreamworkhq.com/blog/mercor-review
NOTE: Only for people with real domain expertise (degree, professional experience). Not for generic entry.

OpenTrain AI

What: AI training job board aggregating roles from multiple platforms. Direct contract roles.
Pay: Varies by role. Data Annotation Generalist: $30-80/hr. Video/Audio Reviewer: $8-10/hr.
Countries: 230 countries for the Video/Audio role. Most roles worldwide.
Apply: https://www.opentrain.ai/jobs/
Live role (Data Annotation Generalist, $30-80/hr, entry level, 20+ hrs/week): `https://www.opentrain.ai/jobs/data-annotation-generalist-`
Live role (Video & Audio AI Data Reviewer, $8-10/hr, entry level, 230 countries): `https://www.opentrain.ai/jobs/video-and-audio-ai-data-`

Scale AI

What: AI data foundry — labeling, RLHF, evaluation at scale. Powers frontier models.
Pay: Varies by project and role.
Apply: https://scale.com/
NOTE: Scale's careers page is JS-rendered. Check Wellfound for Scale AI postings.

TIER 2: Freelance AI-Adjacent Work

If you have ANY marketable skill (writing, editing, research, translation, basic coding, design), you can sell it as AI-adjacent work.

Contra

What: Commission-free freelance platform. AI developers, content creators, brand designers listed.
Apply: https://contra.com/

Upwork / Fiverr

Search for: "AI content editing", "AI prompt writing", "AI data annotation", "RLHF", "AI training data", "LLM evaluation"

TIER 3: Junior AI Engineer Jobs (Need Some Experience)

These are real job postings with working links, but they typically want 1-2 years experience or a portfolio.

Wellfound (AngelList) — Junior AI Roles

244 AI/ML roles (238 remote). Categories: ML Engineer, Prompt Engineering, Generative AI, Fine-tuning, NLP.

Glassdoor — Junior AI `https://glassdoor.com/Job/remote-junior-artificial-intelligence-jobs-SRCH_IL.0,6_IS12609_KO7,37.htm`

26 junior AI roles. Live examples:

- AuraOne — Human Data Junior Software Engineer — AI Quality & Testing ($30-42/hr, remote)
- micro1 — Cocos2d-x Junior Game Developer — AI Trainer ($50-120/hr, remote)

Indeed — Remote AI No Experience `https://www.indeed.com/q-remote-no-experience-ai-jobs.html`

Live roles include Meridial AI Training Generalist ($20/hr, no experience needed): `https://www.indeed.com/q-remote-ai-training-jobs-no-e`

The Reality Check

Most accessible, decent pay, realistic:

1 DataAnnotation.tech — IF you're in US/CA/UK/IE/NZ/AU. Best pay-to-effort ratio.

2 Outlier AI — 61 countries, $15/hr generalist, higher for experts. Sign up today.

3 Remotasks — 90+ countries, lower pay but most accessible globally.

4 OneForma — 100+ countries, slow approval, low pay ($7-15/hr), but truly global.

Higher pay, harder to get:

5 Mercor — $25-250/hr but needs real domain expertise.

6 OpenTrain AI — Some roles pay $30-80/hr but competitive.

7 Scale AI / Surge AI direct — Hard to get into without connections.

Traditional junior AI jobs (Wellfound, LinkedIn, Glassdoor):

- Most want 1-2 years experience
- Remote entry-level is rare — AI Hiring Board says only 1 of 50 entry-level roles was fully remote
- New-grad Forward Deployed Engineer roles pay best ($120K-260K) but are highly competitive

The smart play: Start with an AI training platform (Tier 1) to get experience and income, then build toward a junior AI role or expertise that unlocks higher-paying work (Mercor, Scale, etc.).
