Engagement Audit — Twinthos

Twinthos.com — October 19, 2026

1. What Was Audited

15 HTML pages: index, workforce, brain, pricing, book, about, contact, questions, services, demo, demos, thankyou, audit, operations-audit, faq, how-it-works

2. Analytics — Zero Installed

> **No analytics platform is deployed.** Grep across all 15 pages for gtag, googletagmanager, plausible, umami, GA4, gtm.js, hotjar, posthog, fathom: *zero matches.*
>
> No Google Search Console access (no gsc configs, no credentials in .env).
>
> Booking form sends to FormSubmit.co with no UTM/conversion tracking on the 28 /book/ links.

3. SEO & Metadata — Incomplete

- **OG tags:** Missing on contact, questions, services, demo, thankyou, audit (7 stub pages). Now added and deployed via commit 910f825.
- **alt attributes:** Zero `alt` attributes on any `<img>` in the site. Action needed.
- **Sitemap:** Missing 3 note pages (digital-employee-cost, digital-employee-vs-chatbot, questions-to-ask-managed-ai-agent). Now added and deployed.

4. Engagement Signals — None Measured

- No pageview data, no bounce rate, no engagement-time tracking anywhere on the site.
- CTA link audit: index (9 book links), workforce (7), brain (10), pricing (6), book (3), about (4), operations-audit (4), faq (4), how-it-works (4). Total: 51 UTM-tagged book links across 9 pages.

5. What Was Fixed This Session

> - **OG tags:** Added to 7 stub pages — live on deployment.
> - **UTM parameters:** 51 /book/ links updated with utm_source, utm_medium, utm_campaign — live.
> - **Sitemap:** 3 note pages added to sitemap.xml — live.
> - **DNS/SSL:** www.twinthos.com cert gap (user to resolve via DNS).

6. Analytics Deployment — Blocked

Umami install timed out after 300s (Prisma native compilation). Docker daemon available but not running. HM

Recommendation: Use hosted Plausible (plausible.io, free tier). Add tracking script to all 15 pages. Configure form conversion events.

7. Open Items

- Analytics server deployment (PaaS or hosted)
- Form conversion tracking on /book/ form
- Alt attributes on all images
- www.twinthos.com TLS cert
- GitHub PAT + Stripe live key rotation (user to do)

Audit completed October 19, 2026. Deployed fixes verified via live curl checks.
